

Weekly Coal Production

Energy Information Administration
Washington, D.C.

Production for Week Ended:
January 7, 1984

Published:
January 17, 1984

Highlights

Production of bituminous coal and lignite in the week ended January 7, 1984, as estimated by the Energy Information Administration, was 12,825,000 short tons. This was an increase of 4,274,000 short tons, or 50.0 percent from production in the previous week. Production in the corresponding week of 1983 was 14,287,000 short tons.

Production of Pennsylvania anthracite in the week ended January 7, 1984, as estimated by the Energy Information Administration, was 64,000 short tons, an increase of 9,000 short tons or 16.4 percent from production in the previous week. Production in the corresponding week of 1983 was 61,000 short tons.

Energy Information Administration Weekly Coal Production

CARNEGIE LIBRARY

FEB 2 1984

OF PITTSBURGH

Weekly Coal Production provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports, and exports, and related supply and demand data are provided as they become available.

Weekly Coal Production is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or necessarily reflecting any policy position of the Department of Energy or any other organization.
